EXPERIENCE

Freck Beauty

Los Angeles, CA | Aug 2019

React.js Frontend Engineer (Freelance)

- Implemented dynamic new UI with client-side rendering using React.js and Next.js, in order to improve performance and increase sales.
- Consumed third party API from Wordpress database using AJAX, avoiding refresh on the pages and making the application more stable and reliable.
- Created pixel perfect UI following mobile-first concept, user-friendly design and clear navigation as specified by the company's designers.

Freelance

Los Angeles, CA | Mar 2019

Software Engineer

- Integrated data from various back-end services and databases.
- Gathered and refined specifications and requirements based on technical needs.
- Cooperated with UI/UX designers to match visual design intent.
- Created responsive site that featured mobile-first concept, user-friendly design and clear navigation.

BandMates

Apr 2019 – Present

- Created wireframes and user stories for the project with Trello
- Used HTML5/CSS3/Bootstrap to create the views of my social media app
- Implemented authentication with sign up / log in / log out functions using Token Based Authentication
- The app has full CRUD functionality using JavaScript and Mongoose on Node.js, React and Express frameworks
- Data is stored, retrieved, and updated using MongoDB Atlas online
- Project deployed using GitHub/Heroku on <https://band-mates.herokuapp.com/>

The Ink Challenge

Mar 2019

- Worked with teammates together to architect, design, and collaboratively build a full-stack application that uses the Python-based Django Web Framework
- App connects to a PostgreSQL database to store user information, Tattoo Shop and tattoo images.
- Authenticate users using Django's built-in authentication to allow users to participate in the challenge, schedule an appointment and checkout.
- Project deployed using GitHub/Heroku on <http://theinkchallenger.herokuapp.com/>

Pocket PT Feb 2019

- Created wireframes and user stories for the project with Trello
- Used HTML5/CSS3/Bootstrap/EJX to create dynamic rendering on the app.
- Implemented authentication with sign up / log in / log out functions using Passport.js, OAuth, and *Google+ API*
- Built the app with full CRUD functionality using JavaScript on Node.js and Express frameworks
- Data is stored, retrieved, and updated using MongoDB Atlas online
- Project deployed using GitHub/Heroku on <https://pocket-pt.herokuapp.com/>

Star Ride Jan 2019

- Project description
- Used JavaScript to manipulate the DOM to render game view
- Used HTML5 and CSS3 to create the visual of the game page
- Implemented Git throughout the process for version control and to test new features on a new branch before implementing them into the master branch
- Project deployed using GitHub Pages on <https://danvieira7.github.io/star-ride/index.htm>
